Art Unit: 3781

1. Claims 10-13, 21, 30, 31, 34, 37-38, 44, and 45 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention as previously set forth.
2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the gummy material must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

3. The drawings are objected to under 37 CFR 1.83(a) because they fail to show how the lips are constructed to be raised as described in the specification. Any structural detail that is essential for a proper understanding of the disclosed invention should be shown in the drawing. MPEP § 608.02(d). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required

in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

4. Claims 6 and 43 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. It is unclear how the lips on the stretchable bands are raised, and the specification is silent in this matter of how the stretchable bands are constructed to be raised at the lips Applicant to provide a cross section at the lip to show this construction. Note the drawing objection.

5. Claims 1, 2, 3, 14, and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Balzano (5056661). Balzano teaches an arm band and a tool holder having at least a magnet 42.

Art Unit: 3781

6. Claims 1, 2, 3, 4, 14, 15, 28, and 39-41 are rejected under 35 U.S.C. 102(b) as being anticipated by Larkin et al. Larkin teaches an arm band with magnets as claimed.
7. Claims 1, 6, 7, 9, 22, 23, and 39 are rejected under 35 U.S.C. 102(b) as being anticipated by McKittrick (2749000). McKittrick teaches an apparatus having a band along with a band with raised lip (note fig. 4). Note the bands in McKittrick are stretchable as claimed. The term stretchable does not exclude one being flexible.
8. Claims 1-5, 14, 15, 28, 29, 39, 40, 41, are rejected under 35 U.S.C. 102 (b) as being anticipated by Finnegan (5593073). Finnegan teaches an armband having at least one tool holder attached to the arm band with the magnet removable from the band (col. 2, ln. 19).
9. Claims 1, 16, 17, 18, 19, 32, 33, 35, 39, 41 are rejected under 35 U.S.C. 102(b) as being anticipated by Bowie et al. (452830). Bowie teaches a flexible arm wrap A, a plurality of attachment points at L and C, and a tool holder (the purse) that can hold a socket wrench as claimed.
10. Claim 20, 36 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bowie in view of Nelson (3682216). It would have been obvious to one of ordinary skill in the art to provide a magnet in the tool holder to enable one to hold additional contents.
11. Claim 1-2, 6, 7, 8, 14, 22, 23, 39, and 41-43 are rejected under 35 U.S.C. 102(e) as being anticipated by Frye et al. (70481625). Frye teaches elastic straps 28 and the strap includes a raised lip (note at 30').
12. Claim 27 is rejected under 35 U.S.C. 103(a) as being unpatentable over Frye in view of Pond. It would have been obvious to one of ordinary skill in the art to provide different size band as taught by Pond to accommodate different types of contents.

Art Unit: 3781

13. Claims 22, 23, 24, 25, 26, and 27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Frye in view of Hunt (5427239). It would have been obvious to one of ordinary skill in the art to provide overlapping bands in the embodiment of Fig. 5, as taught by Hunt to accommodate additional contents.

14. Claims 1, 6, 7, 9, 14, 22, 23, 32, 39, 41, 42, and 43 are rejected under 35 U.S.C. 102(b) as being anticipated by Bass (2881441). Bass teaches a strap having a plurality of stretchable bands
94.

Regarding claim 9, note the raised lip (adjacent to the connector at 96).

15. Claims 24 and 25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bass or Frye. Official notice is taken teaches that it is known in the art to provide an elastic band from either plastic or rubber to provide the desired material for the elastic bands.

16. Claim 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over Frye or McKittrick in view of either Baumann, Jr. (3360224) or Smithers et al. (3480012). It would have been obvious to one of ordinary skill in the art to provide a soft rubber liner as taught by Baumann or Smithers to strengthen the device.

17. Claims 1, 2, 6-9, 14, 22, 23, 32, 33, 35, 39, 41, 42, and 43 are rejected under 35 U.S.C. 102(b) as being anticipated by Baird (5842584). Baird teaches a band and a tool holder removably attached as claimed (col. 3, ln. 52).

Regarding claim 6, each of the loops in Baird comprises one bad as claimed, and there are at least several that are spaced apart.

Regarding claim 8, note the liner at 24.

Art Unit: 3781

18. Claims 3, 4, 5, 15, 28, 29,36, 40, and 41 are rejected under 35 U.S.C. 103(a) as being unpatentable over Baird '584 in view of Henderson (6702112). It would have been obvious to one of ordinary skill in the art to provide a tool holder with magnets 36 to provide an alternative tool holder.
